ANNUAL REPORT 2011 TO 2016

- **Name of the department: Computer Science**
- **Date of Establishment :1996**
- **Quality policy :**
  - **To provide quality education to all students aspiring for bright future in the field of computer science.**
  - **To promote research activities and to develop research environment among all students.**
  - **To inculcate values so as to live a better and healthy life.**
  - **To provide a base to be able to cope up with today's competitive world and serve the computer industry and society as well.**

- **Best Practices:**
  - **Frequent get together to flourish healthy and friendly environment among staff.**
  - **To provide monitory help to needy students.**
  - **Encouraging students to involve and take responsibilities of various activities like 'Interaction' and 'Soft skill workshop' conducted by the department every year.**

- **Courses offered:**

- **Innovative teaching methodologies adopted:**
  Innovative teaching is necessary for the present and future of education to help students to reach their full potential. Higher education should serve the long term intellectual needs of the student, for example, whether providing new material by teachers helped the student to gain new insights or opened up new channels of intellectual stimulation or enhanced student's essential and creative thinking power?. Innovative teaching is a necessity for all teachers in order to meet the educational needs of the new generations. However, teachers' competency for innovative teaching is a key factor influencing innovative teaching performance. Some research points out that many teachers lack competencies for innovative teaching
  We follow innovative teaching methods as follows:
  1. Project Based learning:
  2. Focus on concepts rather than facts
  3. Skill based learning….importance given to skills along with knowledge
  4. Explanation about activities during interaction…development of leadership quality.
