Progressive Education Society's Modern College of Arts, Science and Commerce (Autonomous), Ganeshkhind, Pune 411016

Two Year Degree Program in Computer Science

(Faculty of Science & Technology)

Syllabi for M.Sc. (Computer Science) Part-I

Choice Based Credit System Syllabus

To be implemented from Academic Year 2022-2023

Title of the Course: M.Sc. (Computer Science)

Preamble: This syllabus is credit-based system to be implemented from the academic year 2022-2023. It is believed that the proposed changes as part of the credit-based system will bring a qualitative change in the way M.Sc. (Computer Science) is taught, which will offer a more enriched learning experience. It aims to provide technology-oriented students with the knowledge and ability to develop creative solutions, and better understand the effects of future developments of computer systems and technology on people and society. The syllabus is about developing skills to learn new technology, grasping the concepts and issues behind its use and the use of computers.

Duration: 2 years

Eligibility:

- Bachelor of Computer science (B.C.S) with 50% marks for Unreserved category and 45% marks for Reserved Category
- BSc (Computer Science) with 50% marks
- Bachelor of Engineering in Computer Science/ Information Technology/Electronics/ Telecommunication with 50% marks
- BSc. In IT or BSC in entire Computer science with 50% marks
- B. Voc in software Development/Information Technology with 50% marks
- BSc. Degree with Computer Science as Principal subject or Computer Science as one of the subject at T.Y.BSc. Level for student with general BSC with 50%

Alshah.

Practical paper implementation strategy:

Subject	Platform
PPL	Linux
Database Technologies	Linux / Windows
AI	Linux
Web Services	Linux / Windows
Cloud Computing	Linux/ Windows/ AWS

Note: Any version of Linux (Fedora/ Redhat/ Ubuntu etc.) can be used as per your comfort

Detailed Syllabus:

Course Code:	Course Name:	Total Lectures			
22- CSUT111	Paradigm of Programming Language	(48 Hours)			
Teaching Scheme:	Examination Scheme:	No. of Credits:			
4 hrs/week	IA: 30 Marks	4			
	CE: 70 Marks				
Course	Student should have basic knowledge of:				
Prerequisites:	Procedural Language like C				
	Object-Oriented Languages (C++ and Java)				
	 Concepts of Operating Systems 				
	Basic Data Structures and Algorithms.				
Course Objectives:	To Prepare student to think about programming la	inguages analytically:			
	 Separate syntax from semantics 				
	 Compare programming language designs 				
	 Understand their strengths and weaknesses 				
	Learn new languages more quickly				
	 Understand basic language implementation techniques 				
	 Learn small programs in different programming Languages 				
Course Outcomes:	After successfully completing this course, students will be				
	 learn syntax from semantics of different programming languages, 				
	compare them and will be able to find pitfalls of them and think about				
	programming languages analytically.				
	 will understand basic language implementation techniques and learn 				
	small programs in different programming language				
Chapter	Course Contents	No. of Lectures			
1	Introduction	2			
	The Art of Language Design				
	The Programming Language Spectrum				
	 Why Study Programming Languages? 				
	Compilation and Interpretation				
	 Programming Environments 				
2	Names, Scopes, and Bindings	5			
	 The Notion of Binding Time 				
	 Object Lifetime and Storage Management 				
	 Static Allocation, Stack-Based Allocation, 	Brn Col			
	Heap-Based Allocation, Garbage Collection	O Jan			
	Treap Busea i modulion, Gurouge concernon				
	Scope Rules				
	•				
	Scope Rules	C. C.			
	Scope Rules • Static Scoping, Nested Subroutines, Declaration	G Sonkhina.

website in AWS using S3.	5		1	

6	Working and Implementation of identity management.	1
7	Write a program for web feed. Using EC2 Service install Red-hat Linux instance and install python and run python program	1
8	Working and Implementation of Platform as a services. AWS Elastic Beanstalk: Use this tool to upload sample code for web apps. (AWS handles the deployment, provisioning and load balancing)	1
9	Virtual Private Cloud	1
10	Launch RDS Instance (AWS).	1

Course Code: 22-CSDT114B	M.Sc. (Computer Science) Year -I Semester- I Course Name: Artificial Intelligence	Total Lectures: (30 Hours)
Teaching Scheme : 4 hrs/week	Examination Scheme: IA: 15 Marks CE: 35 Marks	No. of Credits:
Course Prerequisites:	 Concepts of Data structures and Design and A Strong data analytics skills. Strong will to learn machine learning languag 	
Course Objectives:	 To learn various types of algorithms useful in (AI). To convey the ideas in AI research and progra related to emerging technology. To understand the numerous applications and in the field of AI that goes beyond the normal 	mminglanguage huge possibilities
Course Outcomes:	After successful completion of course students will be	e able to:
	 Learn the applications of A* and AO* algorith Learn different knowledge representation tech Learn machine learning basics using Python 	
Chapter	Course Contents	No. of Lectures
1	 Introduction to Artificial Intelligence: Introduction and Intelligent systems What Is AI, The Foundations of Artificial Intelligence, The History of Artificial Intelligence Applications of AI Early work in AI and related fields AI problems and Techniques. 	2
2	 Defining AI problems as a State Space Search: example, Search and Control Strategies, ProblemCharacteristics, Issues in Design of Search Programs, Production System. Blind Search Techniques:-BFS, DFS, DLS, Iterative Deepening, Search, Bidirectional Search, Uniform cost Search. Heuristic search techniques: -Generate and test, Hill Climbing, 	8

3	Knowledge Representation:	8
	 Representations and Mappings 	
	 Approaches to Knowledge representation, 	
	Knowledge	*
	Representation method	
	Propositional Logic, Predicate logic	
	 Representing Simple facts in Logic 	
	Resolution, Forward and backward	
	chaining	
	Game Playing- Minimax Search	
8	Procedures	
	 Adding alpha-beta cutoffs. 	
1	Introduction to AI with Python:	
	 Introduction to Python 	
	 why python with AI 	
4	 Features of Python, Basics of Python 	6
8	 Python statements 	
	 Methods & Functions using python 	
5	 Basic and advanced modules &Packages 	
	 PythonDecorators and generators 	
	Advanced Objects & Data structures.	
	Machine Learning:	
	Why Machine learning	
5	 Types of Machine Learning 	6
	 Supervised learning- Classification & 	
	Regression.Random Forest, KNN	
	Algorithm.	
	 Unsupervised learning-Clustering & 	
	Association.Reinforcement learning.

Modern College of Arts, Science and Commerce (Autonomous), Ganeshkhind, Pune 411016 M.Sc. (Computer Science) Year -I Semester- I		
Course Code: 22- CSDP114B	Course Name: Artificial Intelligence Practical	Total Practical's: 10
Teaching Scheme: 2 hrs/week	Examination Scheme: IA: 30 Marks CE: 70 Marks	No. of Credits:
Course Course	 Basic knowledge of Design and Analysis of algorithms Basic knowledge of data structure concepts and program To understand working of different AI algorithms 	nming languages
Objectives: Course Outcomes:	 To understand basic machine learning concepts After successful completion of course students will be able to: Implement different AI algorithms using Python Implement basic machine learning algorithms using Python 	hon
Assignment Number	Assignment Name	Number of Sessions
1	Subject teacher should conduct first lab practical on basic programs using python forintroducing and using python environment such as, a) Program to print multiplication table for given no. b) Program to check whether the given no is prime or not. Program to find factorial of the given noand similar programs.	1
2	Write a program to implement List Operations (Nested list, Length, Concatenation, Membership, Iteration, Indexing and Slicing), List Methods (Add, Append, Extend & Delete)	1
3	Write a program to Illustrate Different Set Operations.	1
4	Write a program to implement Simple Chatbot.	1
5	Write a program to implement Breadth First Search Traversal.	1
6	Write a program to implement Depth First Search Traversal.	1
7	Write a program to implement Water Jug Problem.	1
8	Write aprogram to implement K -Nearest Neighbor algorithm.	1
9	Write a program to implement Regression algorithm.	1
10	Write a program to implement Random Forest Algorithm.	1

Modern College of Arts, Science and Commerce (Autonomous), Ganeshkhind, Pune 411016			
Course Code: 22-CSDT 114C	M.Sc. (Computer Science) Year -I Semester- I Course Name: Web Services	Total Lectures: (30 Hours)	
Teaching Scheme: 4 hrs/week	Examination Scheme:IA: 15 Marks CE: 35 Marks	No. of Credits:	
Course Prerequisites:	 Strong knowledge about Java programming. Good Understanding of Object-Oriented Programmingon Must be familiar with XML. 	oncepts.	
Course Objectives:	 To understand the details of web services technologies lies. To learn how to implement and deploy web service clier. To explore interoperability between different framework. To understand the concept of RESTful system. 	at and server	
Course Outcomes:	After successful completion of course students will be able to: • Learn different web service architectures • Learn SOAP protocol • Learn WSDL and REST architectural styles		
Chapter	Course Contents	No. of Lectures	
1	Web Service and SOA fundamentals Introduction to Web Services — The definition of web services, basic operational model of webservices, tools and technologies enabling webservices, benefits and challenges of using web services. Web Services Architecture — Web servicesArchitecture and its characteristics, core buildingblocks of web services, standards and technologies available for implementing web services, web services communication models, basic steps of implementing web services.	6	
2	soap simple Object Access Protocol Interapplication communication and wire protocols, SOAP as a messaging protocol, Structure of a SOAP message, SOAP communication model, Building SOAP Web Services, developing SOAP Web Services using Java, Error handling in SOAP, Advantages and disadvantages of SOAP.	8	

3	Unit III: Describing and Discovering WebServices WSDL - WSDL in the world of Web Services, Web Services life cycle, anatomy of WSDL definition document, WSDL bindings, WSDL Tools, limitations of WSDL, Service discovery,role of service discovery in a SOA, service discovery mechanisms, UDDI - UDDI Registries, uses of UDDI Registry,Programming with UDDI, UDDI data structures, support for categorization in UDDI Registries, Publishing API, Publishing information to a UDDIRegistry, searching information in a UDDI Registry, deleting information in a UDDI Registry,limitations of UDDI.	8
4	Unit IV: The REST Architectural style Introducing HTTP, The core architecturalelements of a RESTful system, Description and discovery of RESTful web services, Java tools andframeworks for building RESTful web services, JSON message format and tools and frameworks around JSON, Build RESTful web services with JAX-RS APIs, The Description and Discovery of RESTful Web Services, Design guidelines for building RESTful web services, Secure RESTfulweb services	8

Modern Colleg	ge of Arts, Science and Commerce (Autonomous), Ganeshkhir M.Sc. (Computer Science) Year -I Semester- I	nd, Pune 411016
Course Code: 22- CSDP114C	Course Name: Web Services Practical	Total Practical's: 10
Teaching Scheme: 2 hrs/week	Examination Scheme: IA: 30 Marks CE: 70 Marks	No. of Credits:
Course Prerequisites	 Strong knowledge about Java programming / PHP / .Net Good Understanding of Object-Oriented Programming of Basic knowledge of XML. 	
Course Objectives:	• To understand how to develop web services using Java/PHF	P/.Net
Course Outcomes:	After successful completion of course students will be able to: • Create dynamic web projects • Create client-based web applications	
Assignment Number	Assignment Name	Number of Sessions
1	Create 'Dynamic Web Project', which will host your web service functionalityto greet the user according to server time and create 'Dynamic Web Project', which will host the client application that will send username and test the webservice.	1
2	Create 'Dynamic Web Project', which will host your web service functionalityto convert Celsius to Fahrenheit and create 'Dynamic Web Project', which willhost the client application that will send Celsius and test the web service.	1
3	Create 'Dynamic Web Project', which will host your web service functionalityto find the factorial of given number and create 'Dynamic Web Project', which will host the client application that will send positive integer number and testthe web service.	1
4	Create 'Dynamic Web Project', which will host your web service functionalityto validate email id (use regular expression) and create 'Dynamic Web Project', which will host the client application that will send email id and test the webservice.	1
5	Create 'Dynamic Web Project', which will host your web service functionalityto validate user name and password (use database for storing username and password) and create 'Dynamic Web Project', which will host the client application that will send user name and password and test the web service.	1
6	Create 'Dynamic Web Project', which will host your web service functionalityto select employee details (use database for storing emp details (eno, ename, designation, salary)) and create 'Dynamic Web Project', which will host theclient application that will send employee name and display the details.	

7

yet-ontrat

7	Create 'Dynamic Web Project', which will host your web service functionality to select Movie details (Movie(mno, mname,release_year) and Actor(ano,aname), 1: M cardinality) and create 'Dynamic Web Project', which will host the client application that will send actor name and display thedetails.	1
8	Create 'Dynamic Web Project', which will host your web service functionality to validate mobile no (use regular expression: should contain only 10 numeric no) and create 'Dynamic Web Project', which will host the client application that will send mobile no and test the web service.	1
9	Create 'Dynamic Web Project', which will host your web service functionality convert Rupees to Dollar, Pound, Euro, and create 'Dynamic Web Project', which will host the client application that will send amount in Rupees& type of conversion and tests the web service.	1
10	Create 'Dynamic Web Project', which will host your web service functionalityto give the suggestion for given key word and create 'Dynamic Web Project', which will host the client application that tests the web service.	1

Course Code: 22-CSUP115	Course Name: PPL and Database Technologies Practical	Total Practical's
		10 +10=20
Teaching Scheme:	Examination Scheme:	No. of
2 hrs/week	IA: 30 Marks	Credits:
Course	CE: 70 Marks	4
Prerequisites:	Knowledge of file system concepts Knowledge of Cand CRR are assurations as a concept of the concept of	
Troi equisites.	 Knowledge of C and CPP programming concepts Strong foundation of Relational database Concepts (B) 	:- 0- A J 1\
Course	busing remained of Relational database concepts (B	
Objectives:	 To Provide an overview of the concept of NoSQL tech To Make the student capable of making choice of what 	
	technologies to use on their application needs	ii database
	To Provide an insight to the MongoDB (Document da)	tahasa) and
	Neo4j(Graph Database)	tabase) and
Course Outcomes:	After successfully completing this course, students will be ab	le to:
	Provide an insight to the different types of NoSQL data	
	life applications.	
	 Understand control structures, arrays, lists, maps, sets 	and static and
	dynamic memory allocation concepts and their implementation	
	 Create and handle databases and queries using various 	NQSQL
	technologies like MongoDB and Neo4j.	
	 Handle graphical queries using Neo4j 	
	PPL Practical	Number of Sessions
	Control Structures	
	1. Write a program to calculate average of	1
	all numbers between n1 and n2(eg.100 to	
	300 Read values of n1 and n2 from user)	
	2. Write a program to read five random	
	numbers and check that random	
	numbers are perfectnumber or not.	
	Arrays	2
	Write a program to find maximum and minimum	
	of an array	
	Write a program to calculate transpose of a matrix and calculate determinant of a matrix	
	Write a program to check if the matrix is upper	2
	triangular or not. String	
	Write a program to count uppercase letters	
	in a string and convert it to lowercase and	
	displaythe new string.	Co.
	Write a program to read a character	6
		//2/200
	from user and count the number of	1101 4 2013

	u. Genie / Category (fixe adventure,	* G 33
	c. Year of released. Genre / Category (like adventure,	W C

	containing given string.	
	Display all the elements of array	2

action, sci-fi, romantic etc.) A filmcan belong to more than one genre.

- e. Actors (First name and Last name)
 - A film can have more than one actor.
- f. Director (First name and Last name)
 - A film can have more than one director.
- g. Release details (It consists of places of release, dates of release and rating ofthe film.)
- 3. An 'Actor' is a collection of documents with the following fields:
 - a. Actor Id
 - b. First name
 - c. Last Name
 - d. Address (Street, City, State, Country, Pin-code)
 - e. Contact Details (Email Id and Phone No)
 - f. Age of an actor.

Queries:

- 1. Insert at least 10 documents in the collection Film
 - a. Insert at least one document with film belonging to two genres.
 - b. Insert at least one document with film that is released at more than one placeand on two different dates.
 - c. Insert at least three documents with the films released in the same year.
 - d. Insert at least two documents with the films directed by one director.
 - e. Insert at least two documents with films those are acted by a pair 'MadhuriDixit' and 'Shahrukh Khan'.
- 2. Insert at least 10 documents in the collection Actor.

Make sure, you are inserting the names of actors who have acted in films, given in the 'Film' collection.

- 3. Display all the documents inserted in both the collections.
- 4. Add a value to the rating of the film whose title starts with 'T'.
- 5. Add an actor named "______" in the 'Actor' collection. Also addthe details of the film in 'Film' collection in which this actor has acted in.
- 6. Delete the film "_____".
- 7. Delete an actor named "
- 8. Delete all actors from an 'Actor' collection who

have age greater than "	
""	
9. Update the actor's address where	
Actor Id is "	
directed by "	
A	3
Assignment 2: Company database	J
1. Create a database with name 'Company'.	
2. An 'Employee' is a collection of documents with the	
following fields:	
a. Employee ID	
b. First Name	
c. Last Name	
d. Email	
e. Phone No.	
f. Address (House No, Street, City, State, Country,	
Pin-code)	
g. Salary	
h. Designation	
i. Experience	
j. Date of Joining	
k. Birthdate	
3. A 'Transaction' is a collection of documents with the	
following fields:	
a. Transaction Id,	
b. Transaction Date	
c. Name (First Name of employee who processed the	
transaction)	
d. Transaction Details (Item Id, Item Name, Quantity,	
Price)	
e. Payment (Type of Payment (Debit/Credit/Cash),	
Total amount paid, Payment Successful)	
f. Remark (Remark field can be empty.)	
Queries:	
1. Insert at least 5 documents in 'Employee' collection.	
2. Insert multiple documents (at least 10) into the	
'Transaction' collection by passing an array of	
documents to the db.collection.insert () method.	
3. Display all the documents of both the collections in a	
formatted manner.	1
4. Update salary of all employees by giving an increment of	80
Rs. 4000.	80
5. Update the remark for transaction id 201.	*
C TT 1 . 1 . 1	16

6. Update designation of an employee named "_ " from supervisor tomanager.

7. Update designation of an employee having Employee

Id as	
8. Change the address of an employee having Employee	
Id as	
Delete transaction made by "	
" employee on the given date.10.Delete all the	
employees whose first name starts with 'K'.	
• •	
Neo4j Practical	Number of
	Sessions 2
Assignment 3: Song Database	2
Consider a Song database, with labels as Artists, Song,	н
Recording company, Recoding studio, song author etc.	
Relationships can be as follows	
Artist \longrightarrow [Performs] \longrightarrow Song \longrightarrow [Written by] \longrightarrow	
Song author.	
Song → [Recorded in] → Recording Studio	
—→ [managed by] — → recordingCompany Recording	
$Company \longrightarrow [Finances] \longrightarrow Song$	
You may add more labels and relationship and their properties, as	
per assumptions.	
a) List the names of songs written by ":"	
b) List the names of record companies who have financed	
for the song ""	
c) List the names of artist performing the song ""	
d) Name the songs recorded by the studio ""	
e) List the names of artists who have sung only songs written by "	
f) List the names of artists who have sung the maximum number of songs recorded by ""studio	
g) List the names of songs financed by "", and sung by "	
Assignment 4: Employee database	3
Consider an employee database, with a minimal set of labels as	
follows Employee: denotes a person as an employee of the	
organization Department: denotes the different departments, in	
which employees work. Skillset: A list of skills acquired byan	
employee	
Projects: A list of projects in which an employee works.A	
minimal set of relationships can be as follows:	
Works in :employee works in a department	
Has acquired: employee hasacquired a skill	
Assigned_to: employee assigned to a project	
Controlled_by: A project is controlled by a department	Sen C
Project_manager :Employee is a project_manager of a Project	88
a) List the names of employees in department ""	15/200
	x 8
b) List the projects along with their properties, controlled by	(3) Comment
department "".	3% thing.
c) List the departments along with the count of employees in	-
it.	
d) List the skillset for an employee ""	

e)	List the names of employees having the same skills as	
	employee ""	
f)	List the projects controlled by a department "" and have	
	employees of the same department working in it.	
g)	List the names of the projects belonging to departments	п
	managed by employee ""

Course Code: 22-CSUT121	M.Sc. (Computer Science) Year -I Semester- II Course Name: Advanced Operating System	Total Lectures (48 Hours)
Teaching Scheme: 4 hrs/week	Examination Scheme: IA: 30 Marks CE: 70 Marks	No. of Credits: 4
Course Prerequisites:	 Working knowledge of C programming. Basic Computer Architecture concepts. Basic algorithms and data structure concepts. 	
Course Objectives:	This course teaches Advanced Operating Systems Concepts using Unix/Linux. This course strikes a delicate balance between theory and practical applications In fact, most Units start with the theory and then switches focus on how the concepts are implemented in a C program. This course describes the programming interface to the Unix/Linux system - the system call interface. It is intended for anyone writing C programs that run under Unix/Linux. This course provides an understanding of the functions of Operating Systems. It also provides provide an insight into functional modules of Operating Systems. It discusses the concepts underlying in the design and implementation of Operating Systems.	
Course Outcomes:	After successfully completing this course, students will be ab	oncepts using g Systems. mplementation
Chapter	Course Contents	No. of Lectures
1	 Introduction to UNIX/Linux Kernel System Structure, User Perspective, Assumptions about Hardware, Architecture of UNIX Operating System (TextBook-1: Chapter Topics: 1.2, 1.3, 1.5, 2.1) Concepts of Linux Programming- Files and theFilesystem, Processes, Users and Groups, Permissions, Signals, Interprocess Communication (TextBook-3: Chapter 1-relevant topics) 	04
2	File and Directory I/O • Buffer headers, structure of the buffer pool, scenarios for retrieval of a buffer, reading and writing disk blocks, inodes, structure of regular file, open, read, write, lseek, close, pipes, dup (TextBook- 1: Chapter Topics: 3.1-3.4, 4.1, 4.2, 5.1-5.3, 5.5-5.7, 5.12, 5.13) • open, creat, file sharing, atomic operations, dup2,	15

	sync, fsync, and fdatasync, fcntl, /dev/fd, stat, fstat, lstat, file types, Set-User-ID and Set-Group-ID, file access permissions, ownership of new files and directories, access function, umask function, chmod and fchmod, sticky bit, chown, fchown, and lchown, file size, filetruncation, file systems, link, unlink, remove, andrename functions, symbolic links, symlink and readlink functions, file times, utime, mkdir and rmdir, reading directories, chdir, fchdir, and getcwd, device special files(TextBook-2: Chapter Topics: 3.3, 3.4, 3.10-3.14, 3.16, 4.2-4.23)	
3	Process Environment, Process Control and	15
	ProcessRelationships	
	 Process states and transitions, layout of system memory, the context of a process, saving the context of a process, sleep, process creation, signals, process termination, awaiting process termination, invoking other programs, the user id of a process, changing the size of the process, The Shell, Process Scheduling (TextBook-1: Chapter Topics: 6.1-6.4, 6.6, 7.1-7.8, 8.1) Process termination, environment list, memory layout of a C program, shared libraries, environment variables, setjmp and longjmp, getrlimit and setrlimit, process identifiers, fork, vfork, exit, wait and waitpid, waitid, wait3 and wait4, race conditions, exec, changing userIDs and group IDs, system function, user identification, process times (TextBook-2: Chapter Topics: 7.3, 7.5-7.7,7.9-7.11, 8.2-8.11, 8.13, 8.15, 8.16) 	06
4	Memory Management	06
	 The Process Address Space, Allocating Dynamic Memory, Managing Data Segment, Anonymous Memory Mappings, Advanced Memory Allocation, Debugging Memory Allocations, Stack-Based Allocations, Choosing a Memory Allocation Mechanism, Manipulating Memory, Locking Memory, Opportunistic Allocation (TextBook-3: Chapter 8) Swapping, Demand Paging (TextBook-1: Chapter Topics: 9.1, 9.2) 	dern C
		16
		Bonkmind
		Kminc

Course Prerequisites	 Strong knowledge about Java programming / PHP / .Net Framework Good Understanding of Object-Oriented Programming concepts. Aust be familiar with XML.	rk
Course Objectives:	To understand how to develop web services using Java/PHP/.Net	
Course Outcomes:	After successful completion of course students will be able to • Learn foundations of HCI • Design and software process • Models and theories of HCI • Web interface design of HCI	
Assignment Number	Assignment Name	Number of Sessions
1	Understand the trouble of interacting with Computers - Redesign interfaces of applications. Select any application, like land-line phone application, registration etc and understand the trouble of interacting with that application. Comment on design of that application as good orbad design based on whether interaction principles are matching with users mental model or not. Redesign the interface for mention the change in design and	
2	Know your client: Select anyone category of user and develop application understanding the user who will be using your system. Comment on the category of user selected and specific features given for the users and identify what kinds of interfaces will they like and why?. Compare with existing system analyze and rate them. Analyze user models and develop user centric interfaces for:	2
	 a. Children (4-5 years of age): An application to teach math Perform analysis of children behavior e.g. their preferences, interests etc b. Teenagers: Design a digital diary for young teens to help them overcome various social pressures they 	r
	deal with during their teen years. The diary should also be like a self help tool which would help them deal with incidents like bullying, peer pressure, etc This is an open project and you can think in any direction to make the children sail through their	300

	te4en years while trying to discover life around them. Perform analysis of teenagers e.g. their problems, interests, needs, etc c. Older generation: Folks from the older generation has been very wary of using their credit card on the Internet. They have various concerns when it comes to paying their bills. Also because of their old age, it will be beneficial for them to use the internet and pay their phone, electricity, gas, etc. bills Analysis of old people e.g. their nature, interests, needs, etc d. Rural people: ATVM for train ticketing in rural area Perform analysis of rural people e.g. their problems, interests, needs, language etc e. Mentally disabled: Design the interface of a game for mentally disabled children. Analysis of mentally disabled e.g. their behavior, problems, interests	
	Any tool or technology can be used for implementation e.g., VB, DOTNET, JAVA, PHP, etc.	
3	Identify 5 different websites catering to one specific goal (eg. Goal on-line shopping and 5 different websites — ebay, amazon, flipkart, zovi, myntra) and perform a competitive analysis on them to understand how each one caters to the goal, the interactions and flow of the payment system and prepare a report on the same. Consider any 8 HCI principles and prepare the following table evaluating the websites. Sr. Principles Poor Average Good Good Excellent No Aesthetically pleasing 2	
4	To achieve simplicity one needs to optimize the number of elements on a screen, within limitsof clarity. And minimize the alignment points, especially horizontal or columnar 1. Calculate Screen Complexity for existing Graphical User Interface (GUI). 2. Redesign the Screen by applying various guidelines to lower the complexity of selected	2 College Shikhind

	Graphical User Interface (GUI) to achieve			
	simplicity			
	Method for Measuring Complexity:			
	1. Draw a rectangle around each element on a screen,	Ø		
	including captions, controls, headings, data, title,		27	
	and so on.			
	2. Count the number of elements and horizontal			
	alignment points (the number of columns in which	۲		
	a field, inscribed by a rectangle, starts).			
	3. Count the number of elements and vertical			
	alignment points (the number of rows in whichan			
	element, inscribed by a rectangle, starts).			
	4. Calculate number of bits required by horizontal			
	(column) alignment points and number of bits	2		
	required by vertical (row) alignment points by			
	applying following formula for calculating the			
	applying following formula for calculations			
	measure of complexity.			
	$C = -N \sum_{n} p_n \log_2 p_n$			
	n = 1			
	o de la			
	C, complexity of the system in bits			
	N, total number of events (widths or heights)			
	m, number of event classes (number of unique widths or			
	heights) pn, probability of occurrence of the nth event class			
	(based on the frequency of events withinthat			
	class)			
	Calculate overall complexity by adding the number bits	9		
	required by horizontal alignmentpoints and vertical			
	alignment points Design/Redesign web user interface based on Gestalt theories and		2	
5	comment on the principle applied and justify. Also analyze one			
	image in which Gestalt principle is applied and comment.			
	Example: Take a look at old IBM logo:			
	Example: Take a look at old 15.1.	*		
	R		000	7
	The state of the s	= 2	10	680
	You recognize the letters as an I, a B, and an M, no		3/100	4
	problem there. But they aren't letters at all; the		6 4	9 19
	whole thing is a compilation of bright blue		1 20	15
	horizontal lines arranged to create the perception of		Par	1
	a set of letters. Gestalt Property used here is		//// 6/4\	WASHI //

	Closure. Closure means that we "close" objects that are themselves not complete; not only completing the figure in our perception, but perceiving the figure as having an extra element of aesthetic design; we lookfor a simple, recognizable pattern.
6	Implement different Kinds of Windows such as message boxes, palette Windows, Pop-up Windows, primary window, secondary window, dialog boxes, message box etc. For every window designed for the application explain: - Purpose - Description - Components - Kind window
Note: Any tool	or technology can be used for implementation e.g., VBDOTNET, JAVA, PHP, etc
